SmartCare+

Enterprise Healthcare Management Solution

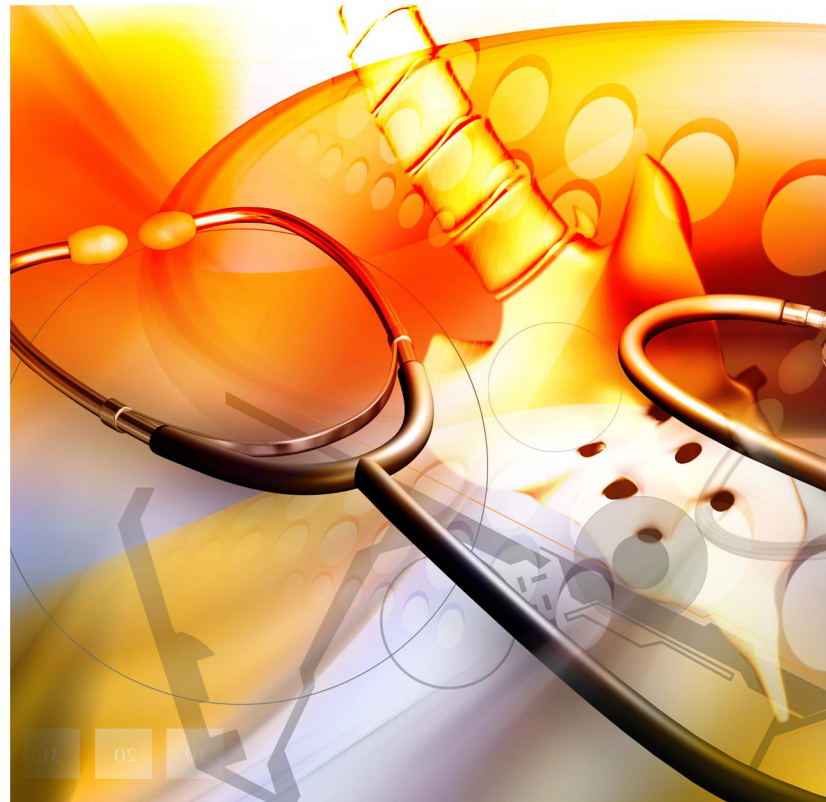

www.pratasolutions.com

End to End Healthcare Management Solution

The solution is developed using industry standard web technology and can be delivered over secure encrypted wireless connections, with WiFi or 3G connections being used to access the application. These mobile solutions can be configured to allow access from both the Intranet and Internet using secure techniques such as Secure Socket Layer (SSL) encryption or Virtual Private Network (VPN) connection.

SmartCare+ provides extensive functionalities in the following areas:

- ✓ Patient Registration and History Tracking
- ✓ Out Patient Records
- ✓ OP Billing
- ✓ IP Admissions
- ✓ IP Billing
- ✓ Patient Ward Management
- ✓ Investigations (Laboratory)

- ✓ OT Management
- ✓ Consultants Management
- ✓ Miscellaneous Services
- ✓ Casualty and Emergency
- ✓ ICU Management
- ✓ Case Sheets
- ✓ Inventory Management
- ✓ Pharmacy Management
- ✓ Blood Bank Management
- ✓ Financial Accounting
- ✓ Medical Records

SmartCare+, end to end healthcare management solution also supports informed care decisions by bringing clinical information immediately and directly into the clinician's hands wherever they are and whenever it's needed, whether it's at the bedside, in theatre, in emergency, on ward rounds or in their private consulting suites.

The solution enables clinicians to receive and exchange patient data from electronic sources and health records across multiple institutions or care settings, facilitating the updating of patient records, efficiently locating patients, reading and updating of clinical notes and reviewing diagnostic results, on the go. It also supports the ability to make informed care decisions.

SmartCare+ simplifies the overall process of the hospital by implementing the various features from Admission of Patient to Discharge or Transfer. This product has various modules addressing the end-to-end solution of all the process involved in the Hospital Management. The key modules are Admission / Discharge / Transfer, Patient Monitoring, Physician Orders, Billing, Pharmacy Ordering, Food Ordering, Payments, Reporting, Voice Recording, Medication Administration Records, and Medical Records modules. This solution makes it easy for the hospitals to transfer from the existing legacy systems or the multiple platforms that the hospitals are currently using into SmartCare+.

SmartCare+ is a Comprehensive Enterprise Application designed to cater to every administrative requirement in the running of a Hospital or Medical Center and it is being developed using J2EE Technology (Java, EJB, SQL Server, and XML).

SmartCare+ is a most powerful tool for managing resources, gathering essential data, conversion of this data into information, and making the information available to the right persons at the right time for informed decision making. The application is fully geared up to meet the demands of running a Modern Hospital or Medical Center. This includes receiving enquiries, confirmation of appointments via the Internet and operating multiple locations and multiple entities without compromising on the Integration of the Application.

This is a web based application, which best suits for the requirements of highly sophisticated hospitals.

This covers almost all functional areas of hospital and the same can be extended to Mobile and Tablet technologies also.
